HISTORY

It was on Saturday, November 23, 1963, that the British Broadcasting Corporation aired the opening episode of Doctor Who. Thus began the amazing odyssey of the mysterious Time Lord from the planet Gallifrey in the constellation of Kasterborus. As the Doctor shuttled through time and space, sorting out galactic problems and vanquishing monsters to the immense delight of an international weekly television audience, the series quickly became a national institution throughout Britain and now has an estimated 110 million viewers in 60 countries around the world. An enormous cult following has spawned a score of active fan clubs and conventions that merchandise countless Doctor Who products, a phenomenon rarely experienced in television.

The stories of the carefree existence of the roving Time Lord captures the hearts and minds of that world wide audience.

For over two decades the Doctor has protected the righteous, doing battle with the forces of evil wherever and whenever they emerged.

THE PRODUCER

Over the years, many American Doctor Who fans have asked why there is no permanent exhibition residing in the U.S. to demonstrate the popularity of the longest running science-fiction series in the world. Your wonderful country is so vast that after much consideration, it was decided that a resident exhibition would be viewed by people in one area only.

Consequently, the Doctor Who "experience theatre on wheels" is the answer to all our prayers - the Doctor's deadliest foes will tour the U.S. for two years and as many states will be included on that tour. as possible. Having viewed the exhibition, I hope that each and every one of you will enjoy it as much as I did.

Yours John Nathan-Turner
